

Connect. Collaborate. Power Africa's Future.

5 - 7 November 2025

Power Africa's Future

A future **We** can build

NSSF Uganda is hosting the All-Africa Pension Summit, which will take place from 5th – 7th November 2025 at Speke Resort Convention Centre, Munyonyo, in Kampala, Uganda.

Decision makers from Africa Pension Funds, will interact with International Finance institutions, Development Finance Institutions, private equity firms, venture capitalists, key political leaders, and other key stakeholders to collaboratively address the continent's challenges and aim for unlocking the full potential of pension capital for Africa's economic and social development.

\$700bn in 1 Room

Organised by 

In partnership with  **EAVCA**
East Africa Venture Capital Association

Background

By the end of 2024, Africa's pension funds held over **\$700 billion** in assets under management (AUM). This is low, (pension assets to GDP ratio of less than 40%), compared to the potential Africa has to increase its pool of available local patient capital that can drive its development agenda. Pension funds, therefore, have a significant opportunity to accelerate and power Africa's future.

Beyond traditional investments in fixed income, equities, and real estate, these funds will drive Africa's economic growth. This can be realised by boldly rethinking approaches towards increasing domestic savings, collaborating with like minded partners, leading the development of infrastructure, and enhancing investments in ESG initiatives.

Expanding Pension Coverage

Deepening the patient capital pool

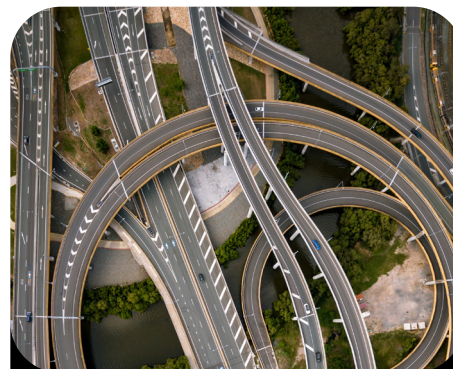

- Best cases studies that encourage and widen long-term domestic savings and increase pension participation.
- Bringing in the informal sector, including agriculture and startups in transforming financial inclusion.
- Innovations that recruit, engage and retain pension members.

Strengthening Partnerships

Leveraging Collaborations for Maximum Impact

- Best practices from funding entities such as non-profit foundations, DFIs, and private equity firms.
- How pension funds can work with governments to enhance financial sustainability.
- Case studies of successful pension-led partnerships driving economic growth.

Pension Funds as Catalysts for Infrastructure Development

- Investment opportunities in infrastructure
- The role of pension funds in financing large-scale projects and accelerating Africa's economic leap.
- Risk management and governance frameworks for sustainable investments.

Enhancing Social Impact: Pensions for Health, Education, and Sustainability

- Learning without borders
- Affordable healthcare for all and pension-backed health initiatives
- Affordable housing solutions.
- Keeping our planet safe
 - Investments for a sustainable future.
